PROJECTS

PERFORMANCE MANAGEMENT SYSTEM

ReactJS, NodeJS, ExpressJS, MySQL

- Implemented a web application that streamlined project planning and resource allocation.
- This centralized platform allows managers to create project timelines, allocate resources, and track task progress in real-time.

DIGITAL REGISTERS

HTML, CSS, JavaScript, Django

- Designed and developed the Loan Review Module in the existing application.
- This application allows the workflow of the loan sanction processes to the client for all branches in India.
- Collaborated with the business analysts, testers and team to build the system as per the client requirements.

FEEDBACK AND SUGGESTION SYSTEM

ReactJS, NodeJS, ExpressJS, MySQL

- Built a web application that allows the vendors and employees to provide their feedback to the higher authorities.
- The application allows transparent communication in the organization.

MATERIAL MANAGEMENT SYSTEM

ReactJS, NodeJS, ExpressJS, MySQL

- Collaborated with the team member and implemented the web application which follows the process of material management as per the client requirements.
- The application allows the client to follow their internal workflow.
